Summary

Full-stack engineer with 3+ years delivering end-to-end production applications across React, Next.js, Node.js, and Python. Raised Lighthouse from 5084, cut payload by 96%, and shipped 60+ components at Livlong. Independently built three full-stack AI SaaS products covering REST APIs, WebSockets, JWT/OAuth auth, SQL and NoSQL databases, and 37 MCP tools deployed across Claude, ChatGPT, and Cursor.

Skills

Technical Skills: JavaScript, TypeScript, Python, React, Next.js, React Router, Node.js, Express, FastAPI, Prisma, MongoDB, PostgreSQL (pgvector), Redis, Firebase Firestore, REST APIs, GraphQL, WebSockets, JWT, OAuth, Zod, TanStack Query, Zustand, Playwright, Vitest, Google Gemini, Vercel AI SDK, MCP (Model Context Protocol), RAG Pipeline, Multi-Agent Orchestration

Practices: Microservices, API Design, Database Design, Test-Driven Development, Agile / Scrum

Platforms: AWS S3, AWS Lambda, GCP, Vercel, Docker, Azure DevOps, GitHub Actions, Git

Experience

Software Developer, Livlong 365 · 2023-07 – Present · Thane

- Revamped livlong.com to Next.js 16, lifting Lighthouse from 5084 and cutting LCP by 45%.
- Unified frontend architecture across four portals by migrating legacy Remix and Svelte modules to React Router v7.
- Shipped 60+ production-ready components across Insurance and Wellness product lines — covering lab-test flows, summary cards, and responsive layouts.

Android Developer Intern, Hapinee Solutions · 2021-01 – 2021-06

- - Led a six-developer team building a CRM-based mobile application.
- - Integrated real-time Firebase data and authentication while contributing to architecture, code reviews, and task delegation.
- - Revamped a user-facing service application, improving UI/UX and reducing reported user complaints by 40%.

Projects

KnownIn - Professional Identity & Resume Workspace · 2026-09

knownin.com

- Architected a full-stack professional identity platform — Next.js frontend, Node.js/Express REST APIs, Prisma ORM with PostgreSQL, JWT auth, and Zod-validated API contracts throughout.
- Shipped 37 MCP tools for real-time profile mutations across Claude, ChatGPT, and Cursor — OAuth-protected endpoints with scoped API keys and server-side secret management.

Cubicle - Self-Hosted Multi-Agent AI Office · 2026-08

github.com/SAURABHRJADHAVCSE/cubicle

- Engineered a full-stack multi-agent AI office — Next.js 3D dashboard, Node.js orchestration backend, MongoDB for per-agent memory, and WebSockets for real-time streaming and agent state sync.
- Connected 12+ CLI/API engines via JWT-secured REST integrations with WebRTC voice calls and media generation pipelines.

Claratto - AI-Powered Adaptive Learning Platform · 2026-02

claratto.com

- Engineered a full-stack AI tutoring platform — Node.js backend with Zod schema-validated streaming, JWT-protected subscription tiers, and a server-authoritative knowledge graph backed by PostgreSQL.
- Built a real-time voice AI interview simulator with WebSockets-powered live feedback and strict end-to-end TypeScript type safety.

CinematicTale - AI Storytelling & Comic Generation SaaS · 2025-12

cinematictale.com

- Built a full-stack AI SaaS — Next.js frontend, Node.js + FastAPI backend services, JWT-secured credit metering, and OAuth login — serving 13 languages and 10 art styles.
- Reduced page payload by 96% (36.8 MB → 1.3 MB) through full-stack performance optimization across CDN, Redis API caching, and frontend bundle tuning.

Education

Bachelor of Technology in Computer Engineering · University of Mumbai · 2019 – 2023
